Overview

LASIK, or “laser-assisted in situ keratomileusis,” is the most common refractive surgery procedure. Refractive surgeries, including LASIK, reshape the cornea to correct distorted vision often eliminating the need for glasses or contacts.

Higher-order aberrations are visual problems not captured in a traditional eye exam. In a young healthy eye, the level of higher-order aberrations are typically low and insignificant. Concern has long plagued the tendency of refractive surgeries to induce higher-order aberration not correctible by traditional contacts or glasses. The advancement of lasik technique and technologies has helped eliminate the risk of clinically significant visual impairment after the surgery.

The following are some of the more frequently reported complications of LASIK:

- 1. Dry eyes
- 2. Overcorrection or undercorrection

The following article covers a topic that has recently moved to center stage—at least it seems that way. If you’ve been thinking you need to know more about unconditional love, here’s your opportunity.

When darkness turns to day, the sun moves over the horizon and touches everything in sight. This movement across the landscape brightens everything. Such an illumination awakens us all. We rise with energy moving in and through us allowing us to create a new day. A day unique from all the rest and creatively woven into our soul. This is the landscape of our soul. As you can see, nature has a way of showing us just how powerful we are. The same power that created the moon and the stars and the movement of all space and time lies within the human heart. It is the heart of creation itself, and perhaps, the heart of our Creator.

Human beings are fortunate to be able to be aware of our awareness. This awareness gives us an opportunity to reflect on our soul and find blessing in being alive. Our consciousness of a creative force inside us guiding us into this world, through it, and eventually to our eternal home allows us to fulfill a purpose on this earth. Such a purpose is beyond our own ability to really know. Yet, we can open our heart

This article covers the basics of Astrology and how they are inter-related. Astrology is defined as ‘the art or practice of determining the supposed influences of the planets and their motions on human affairs and human disposition’. From this practice a horoscope can be produced - a diagram (or chart) of the relative positions of planets and signs of the Zodiac at a specific time, usually the time of birth. A forecast can then be produced.

The French Revolution constituted for the conscience of the dominant aristocratic class a fall from innocence, and upturning of the natural chain of events that resounded all over Europe; the old regime became, in their imaginary, a paradise lost. This explains why some romantic poets born in the higher classes were keen on seeing themselves as faded aristocrats, expelled from their comfortable milieu by a reverse of fortune or a design of destiny.
